EDUCATIONS

BA Information and Communication
Technology
**University of Science and
Technology of Hanoi**
2023 - 2026

SKILLS

Programming
Java, JDBC
Web Development
JSP/Servlet, JavaScript, Java OOP
Database/SQL
SQL, MySQL, PostgreSQL
Tools & Environment
Github, IntelliJ, VScode

LANGUAGES

English (IELTS 6.0)

ABOUT ME

I am final-year ICT student. Experienced in building and deploying Fullstack applications by Java, JSP, Servlet, JDBC, and MySQL.

PROJECTS

Oct 2025- Jan 2026
Project: Online Learning System (programmize.site)

- Description:** A web-based Learning Management System (LMS) that enables learners to access, study, and practice programming courses online. The system provides course, class, and learner management features. It serves both students and working professionals, supporting self-study or scheduled group classes.
- Role:** Team Leader and Backend Developer
- Technologies:** Java, JSP/Servlet, MySQL, HTML, CSS, Bootstrap
- Contributions:**
 - Designed backend architecture and relational database schema
 - Implemented core quiz logic including submission and automatic scoring
 - Integrated VNPay payment gateway and handled payment callbacks securely
 - Implemented user registration with OTP-based email verification
 - Built basic CRUD interfaces using JSP and Bootstrap
- Key Modules:**
 - Authentication & Authorization (OTP-based email verification)
 - Student Learning Interface for course participation
 - Payment & Enrollment Management integrated with VnPay
 - User Profile Management
 - Admin & Instructor Dashboards for system and content management
- Project Scope:**
 - Support multiple user roles: students, instructors, and administrators
 - Enable course browsing, enrollment management, and class scheduling
 - Provide admin dashboard for system and user management
